DETAILED ACTION

1. This application has been examined. This is a continuation of S.N. 08/978027, filed 11/25/97, now U.S. Patent 6,400,379.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-103 are rejected under the judicially created doctrine of double patenting over claims 1-82 of U. S. Patent No. 6,400,379 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: the claims are broader versions of the claims recited in the '379 patent. For example, claim 1 of the '379 patent shows the apparatus for displaying a primary display and a window containing additional information,

including a display device with a screen, displaying means to display the primary window, exposing means to generate and display the window containing the additional information on the screen such that the window is located beneath the primary display while the primary display is displayed on the screen and is exposed by removing the primary display from on top of the window. Claim 1 of the '379 patent goes beyond in reciting the sliding means sliding in a particular direction, and the broadcast information, for example. All the independent claims are broader in the present invention, even including the new set claims 89-103.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
